

The crew builds your outbound motion. BDR.ai makes it run.

Six AI agents plan your outreach, find your buyers, research the companies you care about, and write in your voice. Connect BDR.ai and the plan stops being a to-do list and starts being pipeline.

WITHOUT BDR.AI

The crew hands you the work

- The Strategist reads your site and builds your Outreach Profile
- The Scout finds real prospects and verifies every LinkedIn URL
- The Researcher scores any company against your ICP and finds the buyers there
- Your leads arrive as a clean CSV. You work the list by hand
- The Stylist rebuilds your LinkedIn presence
- The Rainmaker shapes your acquisition offer and lead magnets
- The Ghostwriter drafts outreach, replies, and posts in your voice
- Then the sending is on you: copy, paste, track, follow up

You get the plan, the leads, and the words.
The sending is your job.

WITH BDR.AI

The crew runs the motion

- + Verified leads push straight into your campaigns. No uploads
- + BDR.ai works the list: connects, messages, follows up, all on human hours
- + Replies land in your Reply Queue the moment they happen
- + A draft waits in your voice. You read it, tap Approve, it sends
- + Answered from your own inbox instead? The queue notices and clears itself
- + Every touch lands on the prospect record, both directions
- + You still approve every send. Nothing goes out without your tap

The same crew, plus an engine that never forgets to follow up.

YOUR LEADS

a CSV on your desk
» **working campaigns**

YOUR OUTREACH

one more thing to do
» **runs on human hours**

YOUR REPLIES

dig through the inbox
» **one tap. Sent.**

Ready when you are: **connect BDR.ai to Pipeline Crew** and the crew starts running the plays it wrote.
